

FIBER CONVERSION BOX PRODUCT SPECIFICATIONS

The fiber conversion box is an essential part of a Daktronics audio system, providing a link between the source equipment and the speakers. The fiber conversion box first converts a balanced analog audio input to high-quality CobraNet® digital audio, and then outputs the signal over fiber optic cable for interference-free, long-distance communication to the speaker location. The fiber conversion box is for indoor use only, typically permanently wall-mounted within 25' (7.6 m) of the source equipment.

DIMENSIONS	WEIGHT	POWER (90-250 VAC)	CONSTRUCTION	COLOR
18" H x 15" W x 4" D (457 mm, 381 mm, 102 mm)	12 lbs (5.4 kg)	3-prong IEC power cord; Grounded outlet required	16-gauge steel	Black

KEY FEATURES

- Compatible with all Daktronics Sportsound® systems
- Analog backup switch for signal redundancy
- Diagnostic ports allow system monitoring and troubleshooting
