

ALL SPORT PRO: PRODUCT SPECIFICATIONS

All Sport Pro adds a digital scoring solution for Daktronics video and numeric scoreboard systems. Users can select their preferred device, either a laptop or wireless tablet, and connect directly to the network through the scoring interface box. This direct and efficient connection enables instant access to scoring and display control. The All Sport Pro software is installed within the interface box which allows for both video display control and scoring through a single device. While one operator creates content on the Show Control computer, a second operator can score the game and play back content on the All Sport Pro device. The interface can also connect to tactile start/stop timing switches for clock management.

All Sport Pro is available for baseball/softball, basketball, football, hockey, lacrosse, soccer, volleyball, and high school wrestling. A practice timing mode is also included.

ALL SPORT PRO SOFTWARE FEATURES

MODERN INTERFACE

Track the game action using a laptop or touchscreen tablet.

PLUG & PLAY

Start scoring instantly with a simple and effortless set up.

TV OUTPUT

The embedded TV feed outputs directly from the interface.

RULE PROFILES

Quickly assign rule configurations for various levels of play, from high school to professional.
